

Get started with Crowdsourced Security

Engage **trusted security researchers** to **uncover vulnerabilities** in your web application front ends, APIs, and mobile applications.

zumaroc

Trusted researchers

With Zumaroc.com uncover risk unknown to your team using trusted security researchers that are highly vetted across Africa.

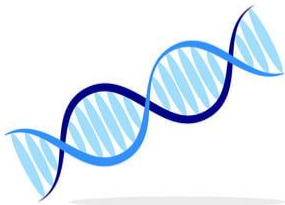

Diffuse fear

Private disclosure programs and trusted security researchers diffuse the fear associated with crowdsourced security.

[Learn about disclosure programs](#)

Digital immunity

Discover high-risk vulnerabilities faster, White-hats reporting bugs across your key attack surfaces is a kind of digital immunity.
